

DOI Work Activity 7L: Restore Forest and Woodlands

Program Area:	Resource Use - Forestry
End Outcome Goal:	UEO 3 – LAND-RELATED RESOURCES – Manage or Influence Resource Use to Enhance Public Benefit, Responsible Development, and Economic Value
Intermediate Outcome:	UIO 3.1 (Forest) – Enhance Responsible Use Management Practices
DOI Sub process:	4d - Conserve resources (perform resource treatments)

Examples/Notes:

Work Activity Description: Acres of forest and woodland timber sales treated for the primary purpose of:

- Salvaging timber killed by insects, disease, fire, or other disturbance mechanism;
- Reducing tree stocking levels, basal area, stem densities, or fuel loading for the purpose of increasing forest resiliency to natural disturbance agents, including insects, disease, fire, wind, or drought;
- Adjusting the vegetative mosaic of a forest landscape for the purposes of improving forest habitat for associated species and/or providing late-succession habitat for associated species;
- Vegetation treatments specifically designed as a result of wildlife or plant habitat analysis are to be counted here and include snag creation and site disturbance to promote growth and/or vigor of certain plants; or
- Vegetation treatments specifically designed to improve or maintain watershed functionality outside of riparian and wetland zones.

Appropriate charges for restoration timber sale treatments include all costs associated with planning (including environmental clearances, NEPA, NHPA, Section 106, Section 7), preparing and implementing projects, including contract administration costs.

Output: Acres treated/restored.	Unit of Measure: Number of acres treated or restored reported in whole numbers.
